PROFESSIONAL PROFILE

I am a diligent individual who has a good work ethic and shows my enthusiasm in any given task or situation. I enjoy learning new things and finding new ways to further develop my skills. I can manage and complete any challenging task on time and to a high standard. I also have great communication skills and can thrive both in a team and as a lone worker. Furthermore, with very high aspirations for my future, I would describe myself as very career driven; constantly looking for avenues to widen my knowledge within the digital industry.

Microsoft Office Suite
Adobe XD
Tableau

Core Skills:

Teamwork
Patience
Problem Solving
Strong Interpersonal Skills
Communication
Attention to Detail
Time Management
Critical Thinking
Creative Thinking
Troubleshoot and Debug

EDUCATION

Heriot Watt University, MEng Software Engineering (Distinction)
2018 – 2023 Edinburgh

The content contained in this course provided me with the fundamentals in the practical and theoretical attributes of Software Engineering. This course included a direct approach to multiple computer labs and provided team group projects also.

- 5th year (Masters) Distinction – MEng Group project: Design and Code Project (**A**)
- 4th year (Distinction): MEng Individual Dissertation: Computer Games for Learning Languages (**B**)
- 3rd year: (Distinction): Software Engineering Group Project (**A**)
- 2nd year (Pass with – all '**A**' scores in 1st semester, all '**P**' scores in 2nd semester due to COVID)
- 1st year (Distinction)

EXPERIENCE

Millersoft Ltd, Edinburgh, Junior Software Developer (Student Industrial Placement): July - December 2022

Working in a software development team, supervised by my Line Manager and a lead Software Engineer

Key Responsibilities

- Collaborated with a team of software developers under the guidance of my Line Manager and lead Software Engineer.
- Developed Apache Druid SQL queries to transform raw client data into meaningful insights.
- Implemented Python Emitter Scripts to deliver real-time formatted data to clients.
- Utilised JMeter environments for comprehensive testing, including data flow analysis and load testing.

Agile KM, Aberdeen, Data Analytics (Student Intern): July – September 2021

Working with a Health & Safety Software team, supervised by a lead Software Engineer.

Key Responsibilities

- Collaborated within a Health and Safety Occupational Health Software team, supervised by a lead Software Engineer.
- Developed proficiency in Python Pandas and Oracle for effective data analysis.
- Ensured accuracy and currency of chemical data sheets by performing updates within the software.
- Utilised Python Pandas and Oracle to seamlessly transfer data between databases.

Agile KM, Aberdeen, Data Analytics (Student Intern): July – September 2019

Key Responsibilities

- Supported in project planning and pitch preparation for future initiatives.
- Updated expired chemical data sheets to ensure accurate information for the software.
- Developed a strong understanding of workflow operations to improve efficiency.
- Created compelling materials for company pitches, highlighting key features and benefits.

Marriott Hotel, Dyce, Aberdeen, (Contract Waiting Staff): July – September, December 2019

My work at the Marriott Hotel gave me an insight to serving different people of varying walks of life well.

Key Skills and Responsibilities Demonstrated

- Able to work in a fast-paced environment.
- Multitasking and prioritising tasks.
- Able to compartmentalise my effort and work efficiently well during busy periods.
- My time management and communication levels improved significantly; this allowed me to work as part of a team more efficiently and successfully.

INTERESTS

Football: I have always had a love for football and in my final year of secondary school, I captained my school senior football team leading us to our School's highest ever position in a cup run.

Programming: In my 3rd year of University, I was part of a small team that developed an Instagram-like web-application using languages such as: JavaScript, HTML, CSS, Node.js and React.js. In my final year, I was a member of an eight-person team that created a web application prototype for our University's honours project system using React.js, Typescript, HTML, and CSS, with Figma as the sole design tool.

Video Editing: I enjoy video editing and consider myself an amateur with the small video projects I create.

ACHIEVEMENTS

Deputy Principal Award

Heriot- Watt University – 2023, 2021, 2019

I was awarded this University prize for achieving an A grade across more than 6 courses in a year.

Duke of Edinburgh Award – Bronze, Silver, and Gold

Albyn School, 2014 – 2018

Taking part in this Scheme has developed my collaboration skills and communication skills whilst allowing me to further develop my critical thinking skills. These transferable skills can be used in group project situations in the workplace.
