EXPERIENCE

Millersoft Ltd, Edinburgh, Junior Software Developer (Industrial Placement): July - December 2022

Working in a software development team, supervised by my Line Manager and Lead Software Engineer

Key Responsibilities

- Developed Apache Druid SQL queries to transform raw client data into meaningful insights.
- Implemented Python Emitter Scripts to deliver real-time formatted data to the client's system.
- Utilised JMeter environments for comprehensive testing, encompassing data flow analysis, load testing, and end-to-end testing.
- System analysis meetings with clients to update requirements and demonstrate the pipeline progress.

Key Achievements

- Developed JMeter environments for all call scenarios resulting in enhanced performance for the developed pipeline against real-time client data.
- Successfully engineered and implemented Python-based Emitter Scripts, achieving real-time transformation of raw streamed data into a structured format without compromising delivery speed.

Agile KM, Aberdeen, Data Analytics (Student Intern): July – September 2021

Working with a Health & Safety Software team, supervised by a lead Software Engineer.

Key Responsibilities

- Developed proficiency in Python Pandas and Oracle to perform data analysis from client data.
- Created PowerBI dashboards using test data from prospective clients.
- Ensured accuracy and currency of chemical data sheets by performing updates within the software.
- Employed Python Pandas and Oracle, crafting Python scripts to transfer data between databases.

Key Achievements

- The creation of PowerBI dashboards resulted in the acquisition of the company's software service by two prospective clients.

Agile KM, Aberdeen, Data Analytics (Student Intern): July – September 2019

Key Responsibilities

- Supported in project planning and pitch preparation for future initiatives.
- Ensured accuracy and currency of chemical data sheets by performing updates within the software.
- Developed a strong understanding of workflow operations to improve efficiency.
- Created compelling materials for company pitches, highlighting key features and benefits.

Key Achievements

- Played a key role in project planning and executing successful pitches, resulting in the acquisition of the company's software service by a prospective client.

Marriott Hotel, Dyce, Aberdeen, Waiting Staff: July – September, December 2019

Key Responsibilities

- Serving breakfast to hotel guests and serving wedding guests during wedding events.
- Providing room service for guests.
- Maintaining health, safety, and food hygiene standards.
- Keeping bar and kitchen area tidy and well-stocked.

INTERESTS

Football

- Albyn School's senior football team captain. A highlight was leading the team to their highest finish in a cup run in the school's history.

Portfolio

- Actively developing a diverse project portfolio to showcase a broad skill set to prospective employers.

ACHIEVEMENTS

Heriot- Watt University, Deputy Principal Award – 2023, 2021, 2019
I was awarded this University prize for achieving an A grade across more than 6 courses in a year.

Albyn School, Duke of Edinburgh Award, Bronze, Silver, and Gold – 2014 – 2018
Participating in this program has enhanced my ability to collaborate, communicate effectively, and sharpen my critical thinking skills, which I can readily apply in future workplace group projects.
